

Expert-Led Security Testing

UK-based certified consultants delivering manual penetration testing that goes beyond automated scanners. We identify real, exploitable vulnerabilities in your applications and infrastructure, providing clear remediation guidance with fixed pricing and transparent scoping.

Why Choose ExploitR?

Manual Testing

Real consultants, not just automated tools or AI

Tailored Advice

Remediation guidance specific to your business and tech stack

Standards-led

OWASP, NCSC, and CREST aligned testing methodologies

Direct Communication

Talk directly with your testers, not account managers

Expert Security Testing

Certified cyber security consultants with extensive experience

Transparent Pricing

Know your costs upfront with transparent, fixed-price proposals.

Our Services

Web & Application Testing

£1,800+

Manual OWASP aligned website, mobile, desktop, and API testing. Covering authentication bypass, and business logic flaw analysis across all privilege levels.

External Network Testing

£1,600+

Internet-facing infrastructure testing including firewalls, VPNs, and exposed services. Essential for compliance.

Internal Network Testing

£2,850+

Insider threat cyber attack simulation with Active Directory assessment, lateral movement, and privilege escalation testing.

Wi-Fi Security

£1,700+

Wireless infrastructure testing covering WPA2/WPA3 encryption, rogue APs, and guest network isolation.

Vulnerability Assessment

£500+

Automated scanning with manual validation, false positive elimination, and prioritised remediation guidance.

Penetration Testing as a Service

£3000+

Continuous pentesting with direct access to consultants, unlimited retesting, and real-time vulnerability tracking through our platform.

Our Testing Process

Every Engagement Includes

- Detailed technical report with evidence
- Executive summary with risk ratings
- Remediation guidance with code examples
- Real-time findings via Attack Surface Center
- Debriefing call with technical teams

Industries We Serve

- Financial Services & FinTech
- Healthcare & Medical Devices
- SaaS & Cloud Platforms
- E-commerce & Retail
- Technology & Software Vendors

Transparent, Fixed-Price Testing — All prices are typical starting points and customised after a brief scoping call

Service	Starting Price	Typical Duration	Best For
APPLICATION TESTING			
Web Application Testing	FROM £2,700	3-6 days	SaaS platforms, e-commerce, customer portals
API Penetration Testing	FROM £1,800	2-4 days	API-first companies, microservices, mobile backends
Mobile Application Testing	FROM £2,800	3-10 days	Mobile apps, fintech, healthcare applications
Desktop Application Testing	FROM £2,700	3-5 days	Enterprise software, financial platforms
Embedded Device & IoT Testing	FROM £4,500	5+ days	IoT Devices, consumer devices and platforms
INFRASTRUCTURE TESTING			
External Network Testing	FROM £1,800	2-5 days	All organisations, compliance requirements
Internal Network Testing	FROM £2,850	3-8 days	Assumed compromise simulation, enterprise networks
Wi-Fi Security Testing	FROM £1,700	1-2 days	Offices, retail, hospitality, healthcare
Vulnerability Assessment	FROM £700	1-3 days	Regular security checks, baseline scanning
CONTINUOUS TESTING			
Pentest as a Service (PTaaS)	FROM £3,200/mo	Ongoing	Security conscious organisations, fast-moving dev teams, continuous deployment
